Pneumatic table-top test pump // -0.7...1 bar

P1.T

P1.T Basic

Highlights

- For calibrations in the mbar range - also directly at the relative zero point
- Pressure adjustment in Pascal steps possible (we recommend the SIKA pressure gauge type B2)
- No contamination of the test sample with oil or water
- Overpressure and vacuum without pressure changeover
- Quick couplings for fast replacement of test samples
- Fine adjustment valve for exact setting of the test pressure
