

## Limescale protection device against limescale, rust, bacteria and biofilm - without salt or chemicals

Healthy, pure drinking water for your home

**DAXTRO - PRODUCED, DESIGNED AND PATENTED IN SWITZERLAND**

For single-family homes/ Buildings up to 800 m<sup>2</sup> / annual water consumption: 200 m<sup>3</sup>, effective against limescale, rust, and algae.

### Why Daxtro?

- ✓ Confidence through tested standards - we have several certifications: CE, ISO 9001, FCC, UKCA, TÜV
- ✓ Multifunctional: effective against limescale, rust, biofilm, bacteria (Legionella, Pseudomonas)
- ✓ DAXTRO® technology, patented worldwide
- ✓ The only device that works against legionella
- ✓ Effectiveness scientifically proven (reference center for legionella in Bellinzona)
- ✓ Simple installation, without opening the water pipe
- ✓ Reliable limescale protection for washing machines, steamers and coffee machines

### Are you looking for a

**way to keep your water guaranteed clean and soft without unnecessary environmental pollution or unforeseeable maintenance costs?**

Welcome to us! With Daxtro technology, we **don't use chemicals, salt, or maintenance-intensive filter systems.** Avoiding Legionella cycles also allows for significant energy cost savings.

We rely on the latest technology “**Made in Switzerland**”, the effectiveness of which has been confirmed by **independent, renowned institutes**

**Professional Line**

For buildings (hospitals, nursing homes, etc.) Buildings up to 1000 m<sup>2</sup> / annual water consumption: 1000 m<sup>3</sup>, – effective against limescale, rust, biofilm, and Legionella (Legionella: Scientifically tested,

**Professional Line**

For buildings (hospitals, nursing homes, industrial facilities, ships) Up to 1,600 m<sup>2</sup> (2 units totaling 3,200 m<sup>2</sup>) / annual water consumption: 2,000 m<sup>3</sup> – effective against Legionella, limescale, rust, and biofilm.)

### How Daxtro technology works: effective limescale prevention through electrical impulses

DAXTRO's patented, groundbreaking DAXTRO technology uses electrical impulses that alter limescale crystals and prevent them from adhering to surfaces. The new technology combats **limescale, rust deposits, algae growth, biofilm, Legionella, and Pseudomonas.** DAXTRO technology uses ferrite cores installed in a PLUG and PLAY around the pipe, enabling effective transmission of signals to the water.

Trust through certified standards

Immerse yourself in the world of pure, soft water – hygienic, sustainable and reliable.
